

The original just gets better...the same superbly engineered product, machined from solid aluminium and steel components, the directional and fixed fittings now come with a reduced depth anti-glare baffle so, whilst still producing a 'dark light' effect for visual comfort and minimal glare more of the stray side sparkle is available for peripheral lighting. Magnetic lamp retention allows for ease of front re-lamping. See 'other bits you will need' section for glass filters, louvres, fire hoods, LED drivers and transformers.
